

# YOU THINK THAT A **\$2.30 PER HOUR INCREASE** IN MINIMUM WAGE IS EXPENSIVE?

Imagine losing that \$2.30 per hour in under 10 seconds?  
That's what's happening at your draught taps.

Your draught pours from the tap at the rate of two ounces per second. At an average cost of 12.5 cents per ounce, that's 25 cents per second.

**YOU CAN LOSE THE EQUIVALENT OF A ONE-HOUR INCREASE IN MINIMUM WAGE IN LESS THAN TEN SECONDS**

if your draught system isn't firing on all cylinders or your staff don't know better.

# WE CAN HELP.
